

RE: 2026 Price Increase – Effective July 01, 2026

Dear Valued HAL Customer,

As the conflict in the middle east stretches on and oil prices remain high, we are left with no choice but to raise our prices to absorb our increased costs. Oil prices effect nearly every part of our supply chain — none more so than the cost of asphalt. While we were able to delay this increase a short while, prices have stabilized at a higher level and we are now forced to do the same.

We are increasing our prices across our range of products by approximately 4% to 6%, depending on the product and category, however we are not increasing the prices of our synthetic roofing underlayments at this time. We are grateful for your continued business and your understanding of the circumstances that have led to this increase.

The new pricing will come into effect on July 01, 2026. We will do our best to get all orders out ahead of this date but are limited to our regular capacity during these times.

We will be sending out updated price lists shortly and are available to answer any questions you may have.

As a Canadian manufacturer we remain committed to providing you with the highest quality products while striving for the best customer service and hope that you understand the need for this action. We value your business and appreciate your continued support.

Best Regards,

Jordon Harco
General Manager
HAL Industries Inc.
