TO: Canada Customers of Siplast Roofing Products

RE: PRICING Update - Siplast Products

Dear Partners,

As global volatility increases with raw materials supply and transportation costs, we have determined the need for future price adjustments in the coming year. It is our intent to be as transparent with our valued customers as possible to prepare for the remainder of 2026.

Last month, we announced increases to most of our major product lines including:

- 5-9% adjustment to SBS-Modified Bitumen Asphaltic Membranes & Accessories
- 5-7% adjustment to Single Ply Membranes & Accessories
- 5-8% adjustment to our Liquids & Coatings Products
- 5-8% adjustment to Polyiso Insulation
- An increase to \$750 per truckload freight and fuel surcharge

The following increases will be implemented throughout Q3 and Q4 via "Not to Exceed" escalators on new quotes and general adjustments to our price lists. We will continue to honour all valid project quotes through their original expiration dates.

Product	July 1	October 1
Asphaltic products	3%-5%	3-5%
Single Ply membranes & accessories	5%-7%	5-7%
Polyiso	5%-7%	5-7%
Adhesives, primers, sealants & caulks	6%-8%	6-8%
All other accessories	6%-8%	6-8%
Liquids and Coatings	3%-5%	3-5%
Freight Surcharge	\$900/TRK	\$900/TRK

With you every step of the way

As the industry faces ongoing challenges with transportation availability, we are working diligently every day to minimize disruptions to your projects. To help us serve you best, please communicate your project needs to us as early and as frequently as possible.

Please never hesitate to contact us directly or discuss any questions with your Area Vice President, Regional Sales Director, or local Territory Manager.

With thanks for your consideration,

Alma Garnett

Frank Griffith
