

COMMUNIQUE

Date: April 21st, 2026

To: All clients - Western Canada

Object: Price increase on Burfalt Product Line – Effective immediatly

Dear Customer,

We are writing to inform you of an adjustment to our pricing due to current market conditions.

Ongoing global volatility has continued to drive significant increases in raw material, manufacturing, and logistics costs.

To ensure the continued supply of high-quality products and reliable service, BP Canada is implementing a **22% price increase** on the following items, **effective immediately**:

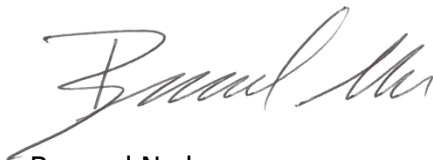

- Liquid Hot Asphalt
- Cold Asphalt (Kegs)

We are actively monitoring market conditions and will reassess pricing as soon as cost pressures stabilize.

Going forward, our prices will be reviewed and updated monthly to reflect current market conditions.

We appreciate your understanding and continued partnership. Should you have any questions, please contact your local BP Canada Territory Manager.

Sincerely,

Bernard Nadeau
Vice-President, Sales
