Subject: Important Update Regarding Shunda Product Pricing

Dear Partners,

We hope this message finds you well. Shunda remains committed to delivering high-quality spray foam and polyurethane products across Canada. We deeply value the trust you place in us as your partner and strive to maintain exceptional service and reliability in meeting your needs.

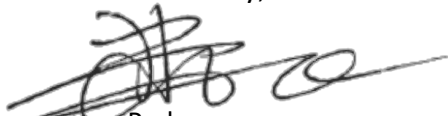

However, due to recent developments in the Middle East, the costs of MDI and other essential raw materials have increased sharply. Despite our best efforts to manage this situation responsibly and mitigate the impact, we are unfortunately unable to fully absorb these rising costs.

Given these circumstances, we are announcing a price increase of CAD \$0.40 per kg for our products, effective May 1, 2026. We will continue monitoring the global supply chain closely, with our primary focus remaining on providing pricing stability and value for your business.

We understand that price changes can pose challenges for your business, and we are here to support you through this transition. Please feel free to contact your dedicated sales manager directly with any questions you may have, or expect them to reach out to you shortly to discuss this further.

Thank you for your continued partnership and understanding.

Yours sincerely,

Sung Park
General Manager
Shunda Polyurethane Ltd.
